

What can your patients catch from their pets?

Parasites.

The Buffalo Academy of Veterinary Medicine and Niagara Frontier Veterinary Society are pleased to present **Dwight D. Bowman, MS, PhD, College of Veterinary Medicine, Cornell University** to discuss **Zoonotic Parasitic Disease from Companion Animals in New York** **Thursday, December 1, 2011, 1-5 p.m.** **The Millenium Hotel 2040 Walden Avenue, Cheektowaga**

In an effort by veterinarians to work with area physicians on parasite connections between pets and people, *physicians are invited to attend this informative meeting free of charge.* Attendance is limited to 100 physicians and reservations are required.

For reservations contact Nancy Fredrickson at nancy@fredricksongroup.com and indicate "Parasites" in the subject line. Include the names of attendees, email, mailing address and phone number. You also may leave a message at (716) 649-4896 with this information. Reservations accepted until November 29 (or until session is full.)

Dwight Bowman, MS, PhD
Professor of Parasitology, Department of Microbiology and Immunology, College of Veterinary Medicine, Cornell University, Ithaca, NY

Dr. Bowman has established an impressive body of work examining compounds for treating parasites in dogs, cats, cattle and sheep, with primary emphasis on soil-transmitted parasites.

Dr. Bowman earned his MS and PhD in parasitology from Tulane University, New Orleans, LA. He completed post-doctorate work on ocular larva migrans at the University of Wisconsin School of Veterinary Medicine. He has been at Cornell University since 1987 where he teaches veterinary parasitology and continues his research on animal parasites.

Your veterinarian. Your *other* family doctor.
